## **REASONS FOR ALLOWANCE**

### ***Allowable Subject Matter***

Claims 1, 2 and 6-15 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1 and 11, prior art fails to teach or reasonably suggest, either singly or in combination, an electric device comprising at least one organic diode comprising a pre-pulse means/pre-pulse generator that applies a positive electric pulse and a subsequent negative electric pulse prior to driving the organic diode in the light sensing state, in addition to the other limitations of the claim.

With respect to claim 8, prior art fails to teach or reasonably suggest, either singly or in combination, a method for driving an electric device in a light sensing state comprising the act of applying a positive electric pulse and a subsequent negative electric pulse prior to driving the organic diode in the light sensing state, in addition to the other limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Booth, Jr. et al. (US 2003/0122749) discloses a display that utilizes organic light emitting diode that operates both as a light emitter and light detector.
